Applicants provided arguments to traverse the written description rejection. Applicant's position is that the claims are directed to a method using host cells having additional nucleic acids encoding enzymes for producing product. Applicants argue that no new nucleic acids and enzymes are being claimed. Applicants cite case law Capon v. Eschhar to support their position.

Applicant's ~~note~~ argue that the Takgi reference of record does not teach "a) condensing two molecules of acetyl-CoA to acetoacetyl-CoA." Thus, the reference cannot be used in the rejection. The Examiner will ~~consider~~ consider applicant's arguments and positions.
